PRODUCTS

DATA COLLECTOR POLES

The first Vibration Data Collector Pole that you can safely use to take the vital information you need!

W&A Data Collector Poles are the most efficient vibration collection instrument on the market! These poles improve safety for the user and can be fitted for any cable connection. Each pole comes with our patented "Flex-Lok" head assembly

ARMADILLO PALM GUIDE™

Our ARMADILLO PALM GUIDE™ is one of the toughest "rodents" on the market! They have been known to run over 15 months with no wear at 6000 FPM. The skin is what makes them unique (5 times harder than white ceramic). It is so hard that it must be finished with diamond treatments to provide the 16RMS prox. finish, making these palm guide paddles incredibly durable in their natural settings! *The "Armadillos" come in many shapes and sizes, and we would be happy to provide a quote to meet your individual needs!*

BOOKS

DOC'S PUMP & STEAM JOURNALS

Westerberg & Associates' best-selling books continue to be a valuable resource for anyone in the pump or steam industry!

Doc's Pump Journal

Nick Westerberg

Doc's Pump Journal is the handbook everyone involved with pumping will want to have in his or her library! This book, with over 700 pages, will make your pumping life much easier.

Doc's Steam Journal with over 568 pages includes information on Water Hammer, Boiler Feed Pumps, Insulation Sizing, Gaskets, Steam Trap types and more...and you don't need a PhD to read them!

Doc's Steam Journal

Nick Westerberg

ASK US ABOUT OUR SPECIAL FOR PURCHASING BOTH BOOKS!!

CONSULTING

Westerberg & Associates provides quality, experienced consulting. We can help improve reliability and maximize safety at your site. Water Hammer, Steam Systems, Cavitation in machinery and Pump Systems, are our specialty!
